# ABOUT US

Airgrade has been producing high-quality cabin suspension bellows since 2009 and is committed to continuous improvement and development without compromising on the customer-focused company philosophy. Airgrade manufactures highly reliable and long-lasting cabin blowers with considerable experience gained over the years and exports to all over the world thanks to the trust environment it creates with its customers.

## Our Vision & Mission

- To be your companion that offers continuous innovative solutions in the field.
- Fulfill customer requests in a complete and timely manner.
- To ensure the development of employees and to provide them a peaceful working environment.
- Never compromise on honesty, accuracy, transparency and reliability.
- To be sensitive to environment and community values.

## Cabin & Seat Air Suspension Systems

## PRODUCTS

### CABIN AIR SPRINGS

Cabin air springs for truck cabins connect the cabin with the stabilizer and reduce vibrations transferred from the frame into the cabin. They can withstand high radial loads and torsional movements, thus ensuring a relaxed and comfortable ride.

### DRIVER SEAT AIR SPRINGS

Not only does Airgrade improve the driver's workspace within all commercial vehicles, our air spring systems also significantly reduce and prevent fatigue by ensuring optimal comfort for the driver.

### NORTH AMERICAN AIR SPRINGS

Our product portfolio ranges from European trucks to North American ones. But the aim is the same: To design and engineer a driver's workspace that provides the most ergonomic and comfortable solution for our customers.
